.NET Software Engineer specializing in **C#, ASP.NET Core, RESTful APIs, and PostgreSQL**, with hands-on experience developing, integrating, testing, and maintaining production software applications. Experienced with **Entity Framework Core, Dapper, SQL, Docker, Hangfire, API integrations, asynchronous processing, troubleshooting, performance optimization, and clean architecture**. Professional experience across **financial-services and fintech environments**, including account-management systems, transaction notification workflows, payment integrations, and production backend applications.

SKILLS

Languages C#, SQL, TypeScript, JavaScript	Engineering OOP, SOLID, Clean Architecture, Dependency Injection, Async Programming, Unit & Integration Testing, API Integration, Debugging, Performance Optimization	Backend .NET, ASP.NET Core, Web API, REST APIs, Node.js, NestJS, Express.js
Frontend React.js, Angular		DevOps & Tools Git, GitHub, Docker, Hangfire, Postman, Visual Studio, VS Code
Fintech Transaction Processing, Financial Applications, Transaction Notifications, Card Infrastructure, ISO 8583, EMV	Data PostgreSQL, MySQL, MongoDB, Entity Framework Core, Dapper, Database Design	

EXPERIENCE

- Backend Developer (Contract)**, Regent Microfinance Bank05/2026 – 07/2026 | Abuja
 - Developed **15+ REST API endpoints** for an Account Management System using NestJS, TypeScript, Prisma, and PostgreSQL, supporting **core banking workflows**.
 - Integrated **BankOne (CBA), QoreID, and BullMQ** across banking and identity-verification workflows, enabling reliable asynchronous processing and third-party service integration.
- Backend Developer**, ReenEdge Solutions10/2025 – 06/2026 | Nigeria
 - Developed **10+ core features** for Whatsella using **C#/.NET and ASP.NET Core**, enabling storefront, customer interaction, and Business WhatsApp automation; integrated **Paystack and Doja**, implemented **Hangfire** background processing, and optimized AI-powered workflows to improve **message delivery and system performance by 20%**.
- Full stack Web Developer (Backend Heavy)**, DeCloud23 Technologies03/2025 – 05/2026 | Ibadan, Nigeria
 - Developed **10+ production features** for Zheetta using **C#/.NET, ASP.NET Core, EF Core, and Clean Architecture**, supporting media sharing, user engagement, and affiliate workflows; optimized **Games4Africa** backend services, improving performance and reducing issues by **20–35%**, while integrating **Paystack, Nomba, and Fincra** and optimizing APIs/database operations for systems serving **100+ users**.
- Frontend Developer**, Kicest11/2024 – 11/2025 | Remote
 - Developed **15+ production features** using Next.js for e-commerce store, inventory, and order management, while optimizing API integrations and database operations to improve **API performance by 15%**.
- Full Stack Web Developer**, Ithena10/2022 – 09/2023 | Virginia, USA
 - Developed **20+ production-ready features** for **iGEMBA** using the **MEAN stack**, digitizing Gemba walks, KPI monitoring, and task management while reducing manual processes by **15–25%** and issue-resolution time by **20–30%**.

PROJECTS

- WAREHOUSEMS — MULTI-TENANT WAREHOUSE MANAGEMENT SYSTEM**
 - Designed and developed a **multi-tenant warehouse/depot management platform** for Omidudun & Kemfun Enterprises using React, NestJS, and PostgreSQL, supporting inventory, depot operations, and business workflows.
 - Applied **SOLID principles, dependency injection, and clean architecture**, implementing tenant-aware data access and authentication/authorization for secure organizational data separation.

EDUCATION

- Bachelor's in Computer Science**, University Of Ibadan2023 – 2028 | Ibadan, Nigeria
Expected 2027 | CGPA: 3.79/4.00 — First Class
Relevant Coursework: Data Structures & Algorithms, Software Engineering, System Architecture & Design, Software Development Lifecycle
